

DRYTREAT - SKAVENJA

Benefits: *Suitable for all natural stone, tiles, pavers, masonry, concrete and grout. Perfect for acid sensitive surfaces including polished and unpolished marble, limestone, travertine and concrete. Multi-purpose water dilutable cleaner - removes grime, grease, rust and soiling. The gel makes vertical and horizontal applications easier and allows a longer dwell time on the surface.*

Application rate: *1 gallon (3.79 L) may be mixed with up to 5 gallons (18.9 L) of clean water to treat approximately 1000 sq.ft. (100 sq.m.) of grout haze or efflorescence, depending on the amount of haze or efflorescence and surface absorption.*

HANAFINN Skavenja™

Skavenja™ is a non-acidic grout haze, efflorescence and rust stain remover scavenger gel cleaner. It is a multi-function cleaner that hunts down and dissolves fresh cement grout, efflorescence and other unsightly contaminants into small suspended particles that can be rinsed away. Skavenja™ gel cleaner is ideal for both vertical and horizontal surfaces.

Typical application: Skavenja™ is ideal for both vertical and horizontal porous surfaces that require cement grout haze or efflorescence or rust stain removal. Eliminates the need to use conventional strong acid cleaning. It has a typical pH of 11 to 12.5.
